| <b>Lehrveranstaltung (Seminar):</b><br><br>Inhalte:<br><br>In this module, we address the more contemporary debates and developments of food business theory and research. We explore, examine and discuss contrasting perspectives of contemporary issues of food business, from a practical and policy-oriented perspective, as well as from a theoretical point of view. We also investigate the research methods applied in food business studies. A particular interest lies in the advancement of knowledge in responsible and sustainable food business.                                                                                                                                                           |                                                               | 4 SWS                                                                                         |
